

# New Zealand Distributed Generation

BOOK 1

## Table of Contents

<b>NZ DISTRIBUTED POWER A .....</b>	<b>2</b>
<b>Executive Summary .....</b>	<b>7</b>
<b>Foreword .....</b>	<b>9</b>
Purpose of the report .....	9
Scope of the report.....	10
Market for this report .....	11
Why New Zealand.....	12
Why not NZ renewable energy investment .....	14
Disclosure .....	14
Energy Users Forum.....	15
Disclaimer.....	15
<b>ECONOMIC MANAGEMENT .....</b>	<b>16</b>
<b>NZ politics.....</b>	<b>16</b>
The constitution.....	16
Executive government.....	16
New Zealand Independence.....	16
Judiciary .....	16
Elections .....	16
Political parties .....	17
Recent election results .....	17
History of NZ administration .....	18
Local government – the administrative regions.....	18
Local government receipts & expenditures .....	19
The relationship between local & national government .....	19
The role of public participation .....	19
<b>The NZ economy .....</b>	<b>20</b>
Issues for NZ’s economy .....	20
International comparison.....	20
Salary & wage income.....	21
Labour participation & employment .....	22
Labour productivity .....	24
Welfare trends.....	26
National population growth .....	27
Migration & immigration .....	31
Tourism industry .....	34
Economic activity.....	34

Economic growth .....	35
Industry sector performance.....	36
Terms of trade .....	37
National savings .....	40
Investment .....	41
Banking sector .....	42
Monetary policy .....	43
Inflation.....	44
Mortgage rates .....	46
The cost of capital .....	47
Household indebtedness.....	47
The securities market (Bonds & equities) .....	48
Current account balance.....	49
Australia-New Zealand's Closer Economic Relationship (CER).....	51
Expat remittances.....	52
Auckland – an internationally competitive city .....	52
Foreign exchange rates .....	52
Taxation system .....	55
Public infrastructure .....	56
Personal income .....	57
Public sector debt .....	58
Budget deficit.....	58
External debt .....	59
National government policy .....	62
<b>The Executive - Government .....</b>	<b>62</b>
Corruption .....	62
Civil disputes.....	62
The road to NZ prosperity.....	62
The economic outlook – 2009 and beyond.....	63
The implication for property investors.....	63
<b>Land Classification.....</b>	<b>63</b>
Classification of land .....	63
Regulation of property development.....	64
History of NZ land administration .....	64
The 1840 Treaty of Waitangi.....	65
Modern land expropriation .....	68
Contemporary National Maori policy .....	68
<b>ENERGY RESOURCE MANAGEMENT .....</b>	<b>68</b>
<b>Electricity market framework.....</b>	<b>69</b>
Electricity market deregulation.....	69

What is wrong with energy policy .....	74
<b>Electricity policy &amp; regulation .....</b>	<b>75</b>
Broad government energy policy.....	76
National Party policy .....	77
Electricity Market Regulatory Framework .....	78
Electricity Governance Rules (EGRs).....	78
Renewable energy policy.....	79
Energy Security.....	81
<b>Carbon science .....</b>	<b>82</b>
Trends in energy utilisation.....	83
The politics of greenhouse warming.....	83
Climate change debate.....	84
Correlation between solar irradiation and Earth's temperatures.....	88
The implications of scientific distortion.....	94
Global warming or cooling?.....	95
The implications for weather forecasting .....	96
NZ's paleo-climate .....	96
<b>Carbon politics.....</b>	<b>97</b>
National policy targets.....	97
Finding international consensus on greenhouse .....	97
Incentivising change .....	98
The distortion of science.....	98
<b>Carbon emissions .....</b>	<b>100</b>
The Kyoto Protocol.....	100
NZ's Climate Change Response .....	100
How will carbon taxes work?.....	101
Climate Change Response Act 2008.....	105
Case Studies in Carbon Credits Trading .....	105
International commitments to EMS and carbon taxes .....	106
Carbon tax or emissions trading.....	108
Current NZ policy direction .....	109
Impact of carbon tax on power generation .....	110
Broader ramifications of carbon credits trading.....	112
Emissions trading scheme - update .....	113
How real is carbon sequestration? .....	114
<b>NZ energy taxation .....</b>	<b>114</b>
The tax rationalisation.....	114
General NZ tax guidelines.....	115
Import taxes .....	117
Depreciation guidelines .....	118

Business deductions .....	119
Energy taxes - electricity .....	119
Energy Taxes – fuel .....	120
Land rates.....	121
<b>Resource Management .....</b>	<b>121</b>
Building regulation .....	121
Getting a Building Permit.....	121
Resource Consent.....	123
Obtaining a Resource Consent .....	124
Applying for a resource consent.....	125
The cost of resource consents.....	126
Dealing with councils.....	127
Finding a planning consultant.....	128
Resource Management Act (RMA) guidelines for councils .....	129
District council project approvals.....	130
The RMA under challenge .....	132
Resource Management Act (RMA) reform .....	132
Test cases for the RMA.....	135
Public accountability.....	137
Development approvals for distributed power generators .....	137
Assessment of Environmental Effects (AEE).....	137
Resource Consent Case study – Mt Stuart Wind Farm .....	138
Air Quality Standards .....	138
Land rights and its legal legacy .....	139
<b>Investment subsidies .....</b>	<b>142</b>
Investment subsidies .....	143
Feed-In Tariff (FIT) .....	144
Fixed price support .....	145
Low Interest Loans .....	145
Government grants.....	145
Tax Incentives.....	146
Distributed power feasibility funding .....	146
Other incentives .....	147
Carbon credits.....	147
<b>Electricity infrastructure regulation .....</b>	<b>148</b>
The uniqueness of the NZEM.....	148
Transmission policy.....	149
Electricity distributor regulation .....	150
Energy trusts/power boards.....	151
Competitive electricity markets .....	152

Transmission/Distributor network competition .....	153
Other regulatory aspects .....	154
<b>Gas market policy &amp; regulation .....</b>	<b>155</b>
The economic importance of gas .....	155
Statutory framework for gas .....	156
Gas market reform .....	156
Gas market participants .....	157
Gas distribution arrangements .....	158
Gas supply security .....	159
Gas exports .....	159
<b>Gas infrastructure regulation .....</b>	<b>159</b>
Geographic distribution of gas assets .....	159
The NZ Gas Pipeline Access Code .....	161
Gas transmission infrastructure .....	161
Gas transmission pricing .....	162
Maui Pipeline Open Access .....	163
Gas network expansion .....	164
Gas pipeline access .....	164
Gas industry future .....	165
<b>Energy Retail market .....</b>	<b>166</b>
Retail market competition .....	167
Market trends .....	167
Market regulation .....	168
Gas industry competition .....	169
Integrated future energy systems .....	170
<b>Chapter Conclusions .....</b>	<b>170</b>
Summary of issues – Book 1 .....	170
Chapter Conclusions .....	172
<b>References .....</b>	<b>175</b>

**Book 2 – continues below**

## Table of Contents

<b>ENERGY RESOURCES .....</b>	<b>182</b>
<b>Fuel resources.....</b>	<b>182</b>
Coal.....	182
Coal seam gas.....	183
Conventional Oil & gas .....	185
Biomass – solid fuels.....	187
Biomass – gas fuels (syngas) .....	188
<b>Fuel Availability &amp; Utilisation.....</b>	<b>189</b>
Coal.....	189
Coal seam methane .....	195
Conventional Oil & gas .....	197
Imported gas (LNG) .....	200
Liquid Petroleum Gas (LPG).....	200
Biomass.....	201
Biofuels - liquids.....	203
<b>Renewable resources .....</b>	<b>204</b>
Solar energy .....	205
Wind energy .....	217
Hydro schemes .....	231
Geothermal.....	235
Marine energy.....	240
Uranium – its role?.....	241
Hydrogen economy .....	241
<b>Chapter Summary .....</b>	<b>242</b>
<b>References.....</b>	<b>244</b>

**Book 3 – continues below**

## Table of Contents

<b>ENERGY APPLICATIONS.....</b>	<b>247</b>
Types of generation.....	247
Conventional vs alternative energy.....	247
<b>Large-scale power generation.....</b>	<b>247</b>
Generating capacity.....	247
State ownership of generators.....	247
<b>Distributed power generation.....</b>	<b>247</b>
The role of distributed generation.....	247
Obstacles to distributed generation.....	247
The role of the EECA.....	247
Christchurch’s distributed power capacity.....	247
Domestic Scale Renewable systems.....	247
<b>New Zealand’s power generation options.....</b>	<b>247</b>
Biogas power generation.....	247
Geothermal power generation.....	247
Fuel cells.....	247
Wind power.....	247
Solar energy.....	247
Gas Stirling engine.....	247
Hydrogen fuel cells.....	247
<b>Solar PV systems.....</b>	<b>247</b>
Solar Photovoltaic (PV) systems.....	247
Concentrator PV.....	247
<b>Solar thermal systems.....</b>	<b>247</b>
Solar tower.....	247
Parabolic dishes.....	247
Parabolic troughs.....	247
Solar Concentrators.....	247
<b>ENERGY RETICULATION &amp; STORAGE.....</b>	<b>247</b>
<b>Electricity Transmission.....</b>	<b>247</b>
New Zealand’s grid.....	247
High Voltage DC (HVDC).....	247
Instantaneous reserves.....	247
System operator.....	247
Regulated price-path for transmission.....	247
Transmission statistics & performance measures.....	247
Network characteristics.....	247
Regulation of transmission infrastructure.....	247

<b>Electricity Distribution .....</b>	<b>247</b>
Basic facts .....	247
Regulated Distributor Price-Quality Paths .....	247
ODA pricing methodology .....	247
Financial performance of distributors .....	247
The proper pricing of distribution .....	247
<b>Gas Transmission.....</b>	<b>247</b>
Gas retailers.....	247
<b>Energy Storage.....</b>	<b>247</b>
Hydro storage.....	247
Hydro pump storage.....	247
Lead acid batteries .....	247
Sodium-Sulphur Battery.....	247
Vanadium Redox Battery (VRB) systems .....	247
Zinc Bromide flow battery.....	247
Superconducting Magnetic Energy Storage (SMES) Devices.....	247
Super-capacitors.....	247
Compressed Air Energy Storage (CAES) systems .....	247
Heat storage cells.....	247
<b>Heat recovery systems.....</b>	<b>247</b>
Heat Exchangers.....	247
Secondary solar radiation.....	247
<b>References .....</b>	<b>247</b>

**Book 4 – continues below**

## Table of Contents

<b>ENERGY MARKETS &amp; PRICES .....</b>	<b>346</b>
<b>NZ primary energy market.....</b>	<b>346</b>
Energy market overview .....	347
Primary energy market.....	347
Primary Energy consumption by sector .....	350
Determinants of future energy consumption.....	353
Fuel availability .....	353
Fuel efficiency .....	355
Market Structure .....	356
Energy market participants .....	357
<b>Electricity Supply .....</b>	<b>360</b>
Cogeneration.....	362
<b>Electricity Consumption.....</b>	<b>362</b>
Peak load profile.....	363
Electricity Demand growth .....	364
Major electricity consumers.....	365
Buying groups .....	366
<b>Demand management.....</b>	<b>366</b>
Energy efficiency .....	367
Load management & renewables .....	369
Metering .....	370
<b>NZ Electricity Market.....</b>	<b>370</b>
NZEM Rules.....	370
Regulation of the NZEM.....	371
M-Co electricity wholesale market place.....	371
Historical development of the NZEM.....	372
Nature of trading activity .....	372
NZ Trading systems.....	373
Emissions trading .....	376
<b>Electricity prices.....</b>	<b>376</b>
Types of markets.....	377
Electricity pricing & contracts .....	378
Trading data.....	378
Trading options .....	379
Electricity trading system.....	380
Trading dynamics .....	381
NZ wholesale price competition.....	386
Electricity prices .....	387

Electricity market power in NZ.....	390
International comparison - electricity prices .....	390
Electricity price determination.....	392
Financial Transmission Rights (FTRs) .....	394
<b>Gas prices.....</b>	<b>396</b>
Gas market .....	396
Gas market pricing .....	397
International comparison - gas prices .....	397
Gas price outlook.....	398
Energy prices outlook .....	399
<b>Risk management .....</b>	<b>399</b>
Quantifying risk.....	399
Managing the Demand Supply Gap.....	400
Quality regulation.....	401
Risk management disclosure .....	402
<b>IETWORK PLANNING .....</b>	<b>403</b>
Asset Management .....	403
New generating capacity .....	404
Grid stability and reserve allocations.....	407
Reserve generating capacity.....	408
Impact of capacity reserve on prices.....	408
<b>Planning transmission infrastructure.....</b>	<b>409</b>
Current Networks Challenges .....	410
Technological change in distribution.....	411
Grid investment planning .....	412
The Generation Expansion Model (GEM).....	412
Grid Investment Test.....	414
Retrofitting transmission infrastructure .....	415
Calculating transmission prices.....	415
Criticisms of transmission pricing methods.....	416
Grid Support Contracts .....	417
Distributor network planning .....	417
Regional renewable energy assessments.....	419
Transmission costs .....	420
Case Study for transmission upgrade.....	420
<b>MARKET ACCESS, CONNECTION &amp; COSTS.....</b>	<b>421</b>
<b>Generator network access arrangements.....</b>	<b>421</b>
The role of the Electricity Commission.....	421
Regulations for centralised plants (>10MW).....	422
Transmission access arrangements.....	423

Commissioning generating plant.....	423
<b>The role of distributed generators .....</b>	<b>424</b>
What is a Distributed Generator?.....	424
The nature of power intermittency.....	424
Technological solutions to primary energy availability .....	425
Technological solutions to variance in primary energy quality.....	425
Regulation of Distributed Generators .....	426
The cost of grid connection .....	428
<b>Embedded or Distributed Generator Connection.....</b>	<b>428</b>
Role of the distributor .....	428
Regional distributor network coverage .....	429
Arrangements for distributed generators.....	429
Distributor line charges.....	431
Distributed generation connections.....	431
< 10kW DG connections.....	431
HomeGen rules.....	434
> 10kW DG connections.....	436
Earnings from power sales .....	437
Contracting for connection .....	438
Congestion management issues.....	438
Obligations of connecting parties .....	439
Distribution loss factors.....	439
Choosing a retailer .....	439
Technical Issues for distributed generation.....	440
Retailer-DG terms.....	440
Retailer-distributor terms.....	440
Distributor DG Regulations.....	441
Distributors as distributed generators .....	441
<b>Intermittent generators (IGs).....</b>	<b>441</b>
Arrangements for IGs .....	441
Wind generator intermittency issues.....	443
<b>Generator connection &amp; despatch.....</b>	<b>447</b>
New generator connection to NZ grid.....	447
Connecting renewable energy to the grid.....	448
Establishing the generating plant specifications .....	449
Connection feasibility.....	450
Line connection & distributed generation.....	450
Connection capacity requirements .....	450
Connection voltage requirements.....	451
The requirements to install generating plant .....	451

The information required by distributor.....	452
Despatch process .....	452
Operational dispatch.....	453
Obstacles for intermittent generators.....	455
Special arrangements for intermittent generators.....	458
<b>Plant Maintenance.....</b>	<b>461</b>
Maintenance Contracts.....	461
<b>Generator Connection Costs.....</b>	<b>462</b>
Distributor connection costs .....	462
Transmission connection costs.....	462
<b>Renewable case studies.....</b>	<b>462</b>
Clearwater Hydro.....	463
Case study – Pukehiki wind turbine.....	463
<b>NZ power transmission.....</b>	<b>463</b>
Unique facts of NZ electricity grid.....	463
Power grid operation.....	464
The HVDC Inter-connector .....	465
Use of the inter-connector.....	465
Quality of transmission infrastructure .....	466
Capital Expenditure on transmission.....	468
New transmission investment.....	470
Grid exit points.....	471
Transmission rentals.....	471
<b>Distribution - Retail electricity market.....</b>	<b>471</b>
Electricity market retailers .....	471
Distributor line constraints .....	472
Distributor line costs.....	473
Connection pricing.....	475
Network fees.....	475
<b>References D.....</b>	<b>476</b>

To purchase the NZ Distributed Power Set of 4 eBooks visit our [website](#) or contact us at [nznewenergy@gmail.com](mailto:nznewenergy@gmail.com) for more information.
